PROFESSIONAL SUMMARY

Senior-oriented Full-Stack Software Engineer with 2+ year of experience delivering scalable, production-grade applications using Laravel, React.js, Next.js, Node.js, and TypeScript. Proven ability to architect high-performance APIs, lead cross-functional teams, and own complex systems end-to-end across the full SDLC. Rapidly promoted from Intern to Associate Engineer within 6 months. Key deliveries include an enterprise Hotel-CMS, HRM system, a real-time ride-sharing platform, and an AI-integrated LMS. BSc IT First Class Honours, GPA 3.76/4.0.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Java, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Angular, Tailwind CSS, Shadcn UI, Bootstrap, Responsive Design

Backend: Laravel, Node.js, Express.js, Spring Boot, RESTful APIs, Microservices Architecture

Databases: MySQL, MongoDB, Prisma ORM, Drizzle ORM, Database Design & Optimization

DevOps & Tools: Git, GitHub, Azure DevOps, CI/CD Pipelines, Docker, Postman, Firebase, AWS, VS Code

Core Concepts: MVC Architecture, OOP, Authentication, CRUD Operations, Agile/Scrum, Code Review, Software Testing

PROFESSIONAL EXPERIENCE

Software Engineer

Feb 2026 – Present

360 Productions Group Pvt Ltd

Colombo, Sri Lanka

- Design, develop, and maintain scalable web and mobile applications in production environments serving enterprise clients using React.js, Laravel, Node.js, and TypeScript
- Build robust backend services with Laravel and Node.js, architecting secure, high-performance RESTful APIs with emphasis on security, performance, and maintainability
- Develop modern, responsive user interfaces with React.js and Next.js, ensuring cross-browser compatibility and optimal UX
- Implement database solutions using MySQL and MongoDB; utilize Drizzle ORM for type-safe schema definition, migrations, and query building in TypeScript-first backend services
- Containerize and orchestrate application services using Docker, streamlining local development and ensuring consistency across staging and production deployments
- Conduct thorough code reviews and mentor junior developers to maintain high engineering standards and best practices
- Participate in full SDLC including requirements analysis, testing, debugging, and deployment; optimize application performance through profiling, refactoring, and implementing caching strategies

Associate Software Engineer

Dec 2025 – Feb 2026

Cybernetic Technologies (Pvt) Ltd

Battaramulla, Sri Lanka

- Designed, developed, and maintained scalable web and mobile applications in production environments serving enterprise clients using React.js, Laravel, Node.js, and TypeScript
- Built robust backend services with Laravel and Node.js, architecting secure, high-performance RESTful APIs with emphasis on security, performance, and maintainability
- Developed modern, responsive user interfaces with React.js and Next.js, ensuring cross-browser compatibility and optimal UX
- Implemented database solutions using MySQL and MongoDB with Prisma ORM for efficient data modeling and queries
- Conducted thorough code reviews and mentored junior developers to maintain high engineering standards and best practices
- Participated in full SDLC including requirements analysis, testing, debugging, and deployment; optimized application performance through profiling, refactoring, and implementing caching strategies

Software Engineer Intern

Jun 2025 – Dec 2025

Cybernetic Technologies (Pvt) Ltd

Battaramulla, Sri Lanka

- Contributed to production-level projects through GitHub repository management and version control best practices
- Developed backend functionality using Laravel framework, implementing business logic and database interactions
- Built responsive frontend components using React.js and Next.js, focusing on component reusability and performance
- Led a small development team, coordinating tasks and ensuring timely project delivery
- Performed comprehensive software testing and debugging in production environments, identifying and resolving critical bugs
- Promoted to Associate Software Engineer within 6 months based on exceptional performance and technical contributions

Junior Software Developer (Intern)

Apr 2024 – Oct 2024

SIBA Dynamics – SIBA Campus

Sri Lanka

- Developed and maintained web applications using PHP, JavaScript, HTML, CSS, and MySQL
- Participated in code reviews, technical discussions, and client system demonstrations
- Collaborated with senior developers on debugging and performance optimization initiatives

KEY PROJECTS

Wilderness Bliss Hotel CMS & Booking Platform | *Next.js, PostgreSQL, Redis, MinIO S3, Docker*

- Built a full-featured hotel management CMS for Wilderness Bliss Hotel (wilderness-hotel-yala.vercel.app), enabling staff to manage rooms, reservations, and content through an intuitive admin interface
- Implemented a PostgreSQL database for structured reservation and inventory data, integrated Redis for high-performance caching, and MinIO S3 for scalable media asset storage
- Containerized the entire application stack with Docker for consistent, reproducible deployments across environments

Human Resource Management System (HRM) | *React.js, Laravel, MySQL, Tailwind CSS*

- Implemented comprehensive modules for shift management, payroll calculations, resignations, and employee allowances
- Integrated frontend and backend services for automated HR operations, reducing manual processing by 60%

UpRide Ride-Sharing Platform | *React Native, Next.js, Firebase, Google Maps API, Stripe, Twilio*

- Developed cross-platform mobile applications for passengers and drivers, plus an admin dashboard
- Implemented real-time ride booking, GPS tracking, fare estimation, secure payment integration, and SOS safety features

Library Management System with AI | *Laravel, MySQL, React Native, Tailwind CSS, AI Integration*

- Built a campus LMS with AI-powered automation for book recommendations and inventory management
- Developed companion mobile application for seamless access and enhanced user experience

EDUCATION

Sri Lanka International Buddhist Academy (SIBA Campus)

Kandy, Sri Lanka

Bachelor of Science in Information Technology – GPA: 3.76/4.0 (First Class Honours)

Jul 2022 – Nov 2025

KEY ACHIEVEMENTS

Rapid Career Progression

2025

- Successfully promoted from Software Engineer Intern to Associate Software Engineer within 6 months, recognizing exceptional performance, technical capabilities, and leadership potential

Production Impact

2024 – 2025

- Contributed to multiple production-grade applications serving real-world users with high availability and reliability
- Demonstrated versatility across the full technology stack, from database design to frontend implementation
